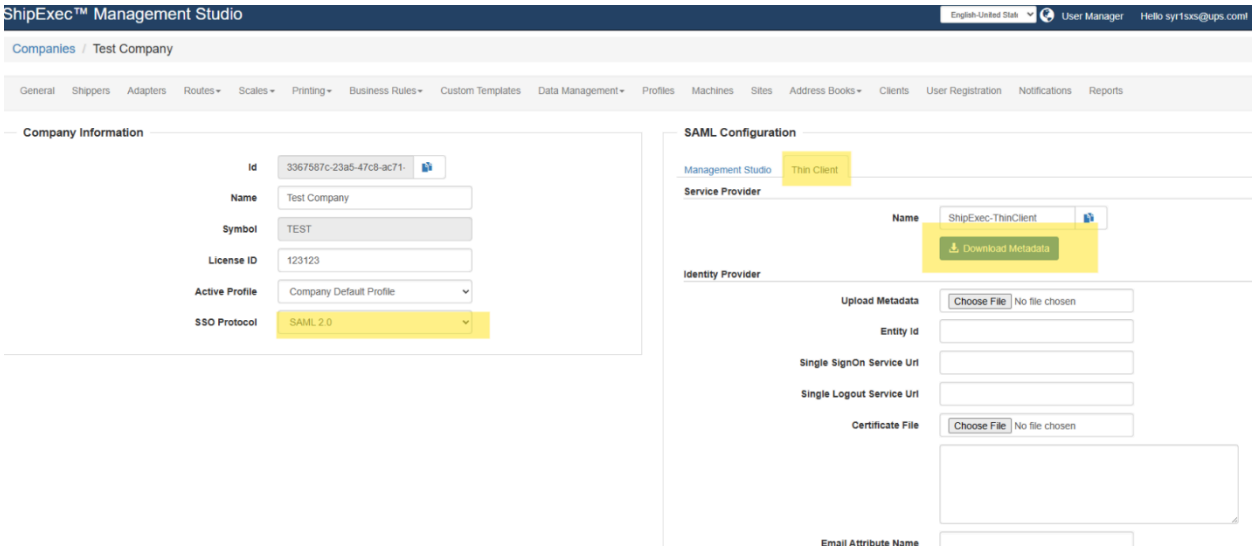
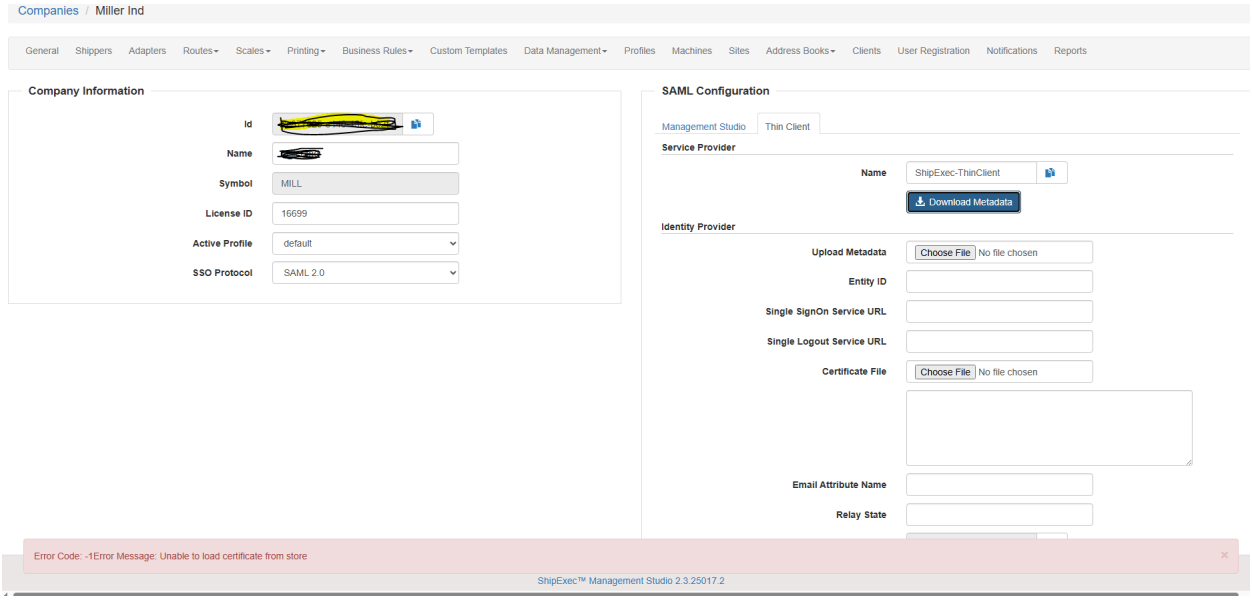
SSO Setup

- Log into their UAT Management Studio
- On the General tab change the SSO Protocol to SAML 2.0
- Click on the Thin Client tab under SAML Configuration
- Make sure the Service Provider is ShipExec Thin Client and click on the Download Metadata button



Send the Metadata file to the customer. Customer then need to use that to create the ultimate XML SAML file that needs to be uploaded (using the Upload Metadata button in the Identity Provider section).

If you are getting the error "Unable to load certificate from store".



Update the thumbprint in MS config file.

```xml
